## **Description:**

### **Learning React**

***A hands-on guide to building maintainable, high-performing web application user interfaces using the React JavaScript library***

As far as new web frameworks and libraries go, React is quite the runaway success. It not only deals with the most common problems developers face when building complex apps, it throws in a few additional tricks that make building the visuals for such apps much, much easier.

What React isn't, though, is beginner-friendly and approachable. Until now. In **Learning React**, author Kirupa Chinnathambi brings his fresh, clear, and very personable writing style to help you understand the fundamentals of React and how to use it to build really performant (and awesome) apps.

- Build your first React app
- Create components to define parts of your UI
- Combine components into other components to build more complex UIs
- Use JSX to specify visuals without writing full-fledged JavaScript
- Deal with maintaining state
- Work with React's way of styling content
- Make sense of the mysterious component lifecycle
- Build multi-page apps using routing and views
- Optimize your React workflow using tools such as Node, Babel, webpack, and others

## Contents at a Glance

**Chapter 1** Introducing React

**Chapter 2** Building Your First React App

**Chapter 3** Components in React

**Chapter 4** Styling in React

**Chapter 5** Creating Complex Components

**Chapter 6** Transferring Properties (Props)

**Chapter 7** Meet JSX-Again!

**Chapter 8** Dealing with State

**Chapter 9** Going from Data to UI

**Chapter 10** Working with Events

**Chapter 11** The Component Lifecycle

**Chapter 12** Accessing DOM Elements

**Chapter 13** Creating a Single-Page App Using React Router

**Chapter 14** Building a Todo List App

**Chapter 15** Setting Up Your React Development Environment

**Chapter 16** The End

**Chapter 17 (Web Edition)** Working With External Data

**Chapter 18 (Web Edition)** Creating a Sliding Menu Using React Motion
